How To Access Bankroll

Bankroll can be accessed by opening a web browser and navigating to <https://bankroll.network>

In order to interact with the contract you need to have an acceptable Tron wallet browser extension installed.

Navigating Around the Website

Menu Links

Social

The Social link points to the telegram chat. The telegram chat is helpful to interact with other members of the community. The community is also available to answer any questions you might have quickly, as well as discuss any strategies around using the Bankroll platform.

Contract

The Contract link points to the contract on tronscan.org. This will show you the total contract balance, as well as any interactions with the contract. When you buy credits or withdraw your earnings, you can see your transactions on tronscan.org. Keep in mind, that bankroll.network is a smart contract. It is immutable and transparent.

Media Kit

This link points to all of Bankroll's media assets available for download. This is free for you to use to help promote the contract. The more people that enter into this contract the longer the contract will pay out.

Walkthrough

If you're a visual learner, the walkthrough link points to a youtube video that instruct users on how to use the platform. This guide will have full and complete instruction on how to use the platform as well.

FAQ

At the time of this writing the FAQ link points to the bottom section of this homepage which does not link to any real FAQ's. However, this guide will have a complete set of FAQ's in the later sections.

How the Contract Works

As you scroll down on the homepage you will see 4 blocks (highlighted in screenshot below). These blocks will be your main areas of where you interact with the Bankroll smart contract. This section will provide full details around what each block does and how you can use it to interact with the Bankroll project.

The screenshot displays the Bankroll website interface with a dark purple and black theme. The top navigation bar includes links for SOCIAL, CONTRACT, MEDIA KIT, WALKTHROUGH, and FAQ. A 'Tx Burn Protection' toggle is visible in the top right. The main header features the 'bankroll' logo and the slogan 'SUSTAINABLE DAILY CASHFLOW FOR ALL'. Below this, several key features are listed: 'Bankroll is a secure, decentralized, and borderless social trust', '3.33% of deposits are paid out daily, down to the minute', 'Earn 1.25% referral compensation indefinitely', and 'Building block for other dApps via the Sponsor API'. The network details are 'Network: Mainnet Bandwidth: 5 K Energy: 5 K' and the wallet information is 'Wallet: TFrYR...ZFSmD Balance: 4.806 TRX'. Four red boxes highlight the following interaction blocks:

- Fund:** Shows 'Total Credits: 214,217 TRX' and 'Referral / Sponsorship Credits: 0.000 / 0.000 TRX'. It includes a 'Funding Amount' input field (containing 'TRX') and a 'FUND' button. The 'Whale Status' is '194,225 K TRX' with a note: 'Suggested deposits grow with the contract'.
- Sponsor:** Features a 'Recipient' address input field, a 'Funding Amount' input field (containing 'TRX'), and a 'FUND' button. A toggle for 'Transfer from existing credits' is present.
- Claim:** Displays 'Total Withdrawals: 2,020 TRX' and 'Pending Referrals / Sponsorships: 0.000 / 0.000 TRX'. It shows a 'Credited / Available Balance: 5,325 / 5,325 TRX' and includes 'WITHDRAW' and 'ROLL' buttons.
- Treasury:** Has a 'Donation Amount' input field (containing 'TRX') and a 'DONATE' button. A note states: '100% of your donation goes to the treasury for long term sustainability'.

The 'About' section at the bottom right explains: 'The Bankroll Project is a social experiment on the TRON blockchain to implement a voluntary, sustainable, and permissionless universal basic income. Distribution: 2.5% to development and referrals, 12.5% to the in-contract treasury, and 85% credit to the depositor/beneficiary. Donations go directly to the treasury.' It also provides a 'Referral Link: https://bankroll.network/?ref=TFrYR...ZFSmD'.

Fund Box

The screenshot shows a dark-themed interface for funding a contract. At the top, the word 'Fund' is displayed in pink. Below it, 'Total Credits: 214.217 TRX' is shown with a red '1' next to it. Underneath, 'Referral / Sponsorship Credits: 0.000 / 0.000 TRX' is displayed with a red '2' next to it. A 'Funding Amount' label is followed by a red '3' and a text input field containing 'TRX'. Below the input field, the text 'Depositor credited 85% of deposit after fees' is shown with a red '4' next to it. A 'FUND' button is located at the bottom left with a red '6' next to it. On the right side, 'Whale Status: 194.225 K TRX' is displayed with a red '5' next to it, and below it, the text 'Suggested deposits grow with the contract' is visible.

1. Shows the total credits you own. If you're not in the contract this will show 0. You have to enter in the amount of Tron you would like enter into the contract (3) and then hit the 'Fund' button (6) and then you will see total credits in this area.
2. This displays the amount of referral and sponsorship credits available to you. We will breakdown how you can receive referrals and sponsorships for this smart contract.
3. As stated in number one, this input box is for the amount of Tron you would like to fund to the contract to get credits.
4. There is a 15% fee on deposits into the contract. So, if you deposit 100 TRX, you will receive 85 Credits. A breakdown of these fees is documented in the later sections of this guide.
5. The whale status shows the total number of TRX in order to be a whale. What makes this project sustainable is this feature right here. If your Total credits (1) is equal to or higher than the whale status (5) then you will not receive the full 3.33% daily return, instead a lower percentage is returned until your Total Credits (1) becomes lower than the Whale Status (5) value. This is beneficial to the contract because it will only pay out a proportional value to that of the total value of the contract, keeping the payouts and the health of the contract more sustainable.
6. This button is pretty self explanatory. After you enter a value in 'Funding Amount', click this button to receive credits.

TX Burn Protection

Tx Burn Protection

Fund

Total Credits: **214.217** TRX

Referral / Sponsorship Credits: **0.000 / 0.000** TRX

Funding Amount

Depositor credited 85% of deposit after fees

Whale Status: **255.002 K** TRX
Suggested deposits grow with the contract

Directly above and to the right of the Fund box is a checkbox with a label that reads 'Tx burn Protection'. If this box is checked when you click on Fund, you will be alerted if you do not have at least 10 TRX in your Tron wallet. Keep in mind, that this is a smart contract. Whenever you interact with a smart contract it requires a small amount of Tron as a fee or gas to make that interaction occur. In the same way your car needs gasoline to run, you need to have spare tron used as gas to help fuel a transaction as it goes from your wallet into the contract.

Claim Box

The screenshot shows a dark-themed interface with the following elements:

- Claim** (header)
- Total Withdrawals: 2.020 TRX **1**
- Pending Referrals / Sponsorships: 0.000 / 0.000 TRX **2**
- Credited / Available Balance: 5.429 / 5.429 TRX **3**
- The lesser of 3.33% of total credits plus referrals or 0.05% of the contract balance
- WITHDRAW** button **4**
- ROLL** button **5**

1. This field displays the total amount of withdrawals in Tron you have taken from the contract. This number is also increased if you reinvest (hitting the Roll button) in the contract as well.
2. **Referrals:** This value stores the amount you have received in referral commissions. You will receive referrals by other people using your referral link as they invest in Bankroll. If they are using your referral link you will receive 1.25% commission on their investment daily as long as there are funds in the contract. **Sponsorships:** This will be discussed in more detail in the next section as we review the Sponsor box, but this value in this box displays the TRX you received from sponsorships.
3. These fields display the current earnings you have received. When you withdraw (4) or reinvest (5) your investment, these values go back to 0.
4. This button withdraws your earnings. Keep in mind, once you enter the contract, all of your money is in the contract and you cannot withdraw that investment, the only withdrawals that can happen are earnings on your investment which is 3.33% daily (if your investment is under whale status) or a lower percentage (if your investment is equal to or greater than the whale status value).

5. This button will reinvest your credited/available balance back into the contract which will grow your credits. This is where you can use the power of compounding to grow your credit balance and receive a higher daily payout over time.

Sponsor Box

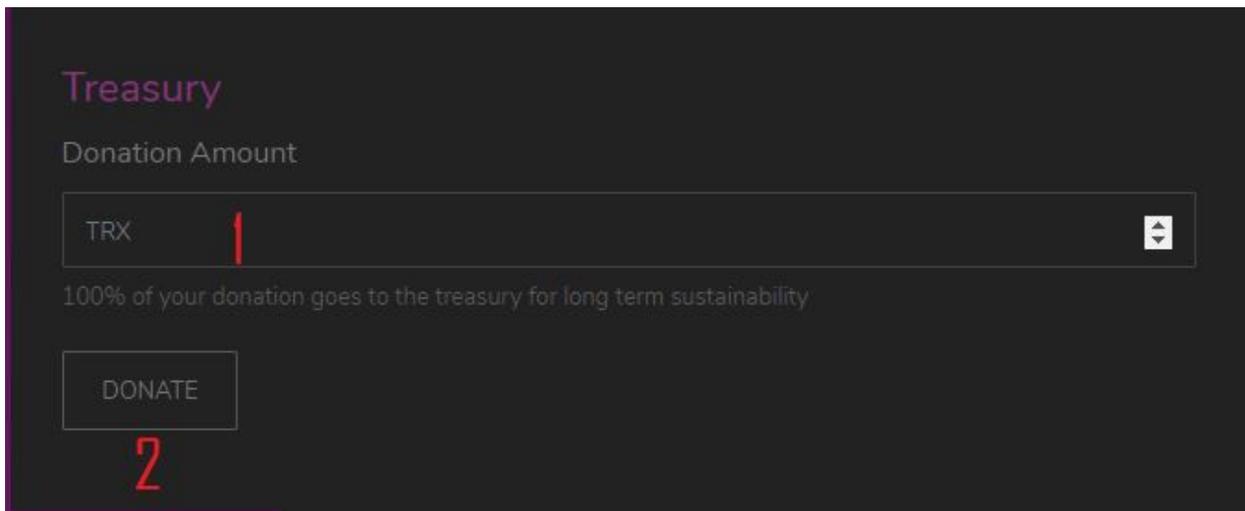

The screenshot shows a dark-themed 'Sponsor' form. At the top, the word 'Sponsor' is written in purple. Below it, the section 'Recipient' contains a text input field for 'Address' with a red '1' next to it. Underneath, it says 'Depositor credited 1.25% referral fee'. The 'Funding Amount' section has a text input field for 'TRX' with a red '2' next to it. Below that, it says 'Recipient credited 85% of deposit after fees'. At the bottom left is a 'FUND' button with a red '3' below it. At the bottom right is a toggle switch with a red '4' above it, and the text 'Transfer from existing credits' below it.

1. The Tron wallet address of the recipient who you would like to sponsor credits to.
2. The amount of Tron you would like to sponsor.
3. The fund button processes the sponsor transaction.
4. This switch allows you to use your own credits from the contract, keep in mind that this will decrease the amount of credits you own in the contract.

What is a sponsor?

A sponsor allows for someone to send Tron to a friend, family member or acquaintance which will turn into credits allowing that special someone to enjoy earning Tron. Here is an example of how it works. John sponsors 100 TRX to Jane. Jane will receive 85 credits in her account and will start earning 3.33% daily on those 85 credits. Since John sent this Tron to Jane, John will receive 1.25% of the 100 TRX, 1.25 credits. Both will receive Tron from this sponsorship for as long as the Bankroll contract has Tron in it to pay out.

Treasury Box

Treasury

Donation Amount

TRX 1

100% of your donation goes to the treasury for long term sustainability

DONATE

2

1. Here you would enter the amount of Tron you would like to donate to the treasury.
2. This button would process the Tron donation to the treasury.

What is the Treasury?

This is really just the contract, this box will allow you to donate Tron to the contract which helps to sustain the project. As long as there is Tron in the contract it will pay people in the contract who hold credits. If you love Bankroll and are feeling generous this is the box to go to help give the contract longevity.

FAQ's

Do Credits go up in value?

No, a credit is not a token that can be exchanged, nor does it go up or down in value. Essentially, 1 TRON = 1 Credit, and it will always stay that way. When you buy 100 TRX you will receive 85 Credits (15% fee on your deposit).

What is the Fee structure?

When depositing into Bankroll a 15% fee is assessed.

Of that 15% fee...

- 12.5% is allocated to the treasury for sustainability of the project.

- 1.25% is paid to referrals or custody (roll).

- 1.25% is paid to custody for development and management of the project

How long until I get my initial investment back?

If I invest 100 TRX into Bankroll, I will receive 85 Credits (after 15% deposit fee). So here is how we can calculate this....

$85 * .0333$ (3.33% Daily) = 2.8305 Tron per day.

Based on 2.8305 Tron per day, I will have my 100 TRX investment back after 35 Days.

I arrived at that number by dividing 100 (my initial Tron investment) by 2.8305 (Tron per day based on 100 TRX investment).

Can I sell a portion or completely remove my position in Bankroll?

When you invest in Bankroll you're not holding a position, you are completely giving your investment to the contract. The only way to get that investment back is to wait on your investment earnings. If you do not roll your earnings you will receive your 100% investment back after 35 days. After 35 days you will be earning 100% profit. Keep in mind, the contract will only pay out if there is Tron in the contract, so promoting the platform in a positive light to your family and friends will help maintain and sustain the contract.
